

Why Al Rahim Textile

Health, Safety & Environment

- Our Belief

Al-Rahim Textile Industries gives top priority to Health, Safety & Social compliance- and our beliefs and practices are aligned with the Policies & Regulations of our customers. Our factory buildings are well constructed and secure. We conduct periodic fire drills and the workers' health & safety issues are adequately addressed. We have programs for recycling our wastes (hot water & hot air) and we are setting up an Effluent Treatment Plant (ETP) to re-cycle more than 80% of waste water from our production.

Certifications

- Of Acceptance

Al-Rahim Textile Industries has valid certificates for its products and facilities and is periodically audited by internationally recognized certification bodies including Oeko Tex 100 Class-I and Class-II , BSCI, C-TPAT, Sedex, GOTS, BRC.

No Energy Shortage

- Self Sufficient

Al-Rahim Textile Industries has its own independent power generation so as to ensure uninterrupted power supply thereby minimizing loss of production. The unique location of Nooriabad Industrial Area is unaffected by gas shortages which gives us a competitive edge over competition.

Capacity To Deliver

- Our Strength

Al-Rahim Textile Industries is one of the largest air jet terry weaving, yarn dyed & jacquard towel capacities in Pakistan. With an annual capacity of 40 Million pounds of finished terry towels, we rely on latest technology to ensure quality and on-time delivery. With independent power generation and negligible shortages in gas supply, Al-Rahim enjoys full capacity utilization as it is not affected by City unrest and strikes and disturbances. Due to vertical integration, all processes are under one management.

Pricing Structure

- Competitive

Al-Rahim has direct access to best cotton growing areas of Pakistan giving a competitive cost advantage which is then coupled by continuous efforts towards enhancing efficiency in manufacturing to lower cost, and also the economies of scale- all added up and shared with our customers by way of competitive pricing. The vertical integration not only gives us very good control on all steps of production, but most important, it contributes towards efficiency and lower costs of production which we share with our customer.

R&D And Quality

- Assurance

Al-Rahim Textiles has matchless research and development (R&D) expertise which greatly supports our customers in developing bestselling products. We make seasonal design forecast and trend boards which is supported by quick sampling. Al-Rahim Textile Industries produce consistent good quality Home Textile products with the help of latest European Plant & Equipment. Stringent process controls and inline quality is maintained with an agile, well equipped laboratory- to support our manufacturing processes at every step.
